

Hakko Soldering Heating Element

You can rest assured to buy Hakko Soldering Heating Element from our factory and we will offer you the best after-sale service and timely delivery.

Model:E6038TKA

Hakko Soldering Heating Element

Hakko Soldering Heating Elements are new type of high efficient heating elements, which can save more than 20%-30% power effect compare to PTC ceramic heaters. Our alumina ceramic heaters have many excellent features:

- 1.High reliability, stable resistance, no electric noise
- 2.Good chemical resistance
- 3.full compliance with EU RoHS (no lead, cadmium, mercury, hexavalent chromium, PCBS, and other harmful substances)

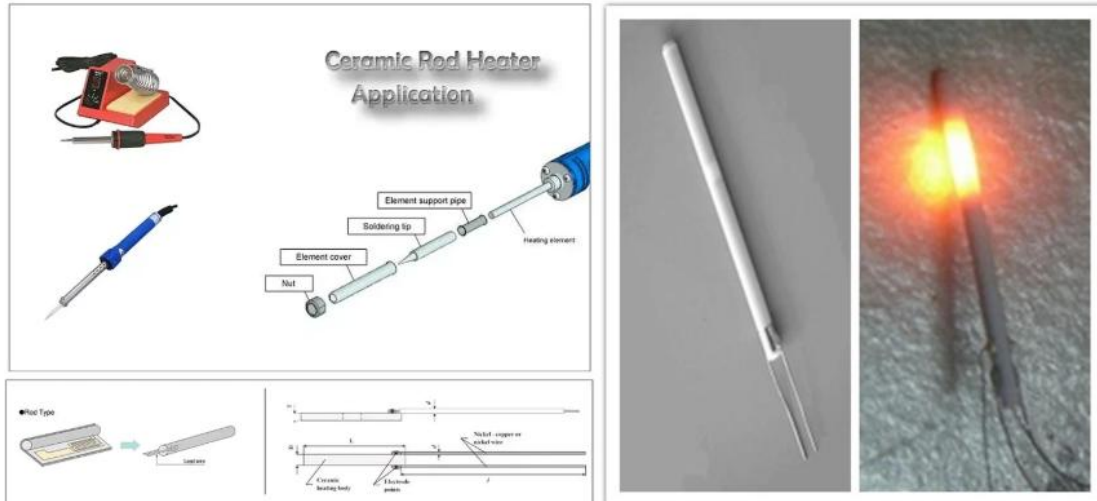

No charge on surface and safe to touch.

Parameter of Hakko Soldering Heating Elements

Heater Name	Hakko Soldering Iron Ceramic Heating Elements
Working Voltage	12V/24V/120V/230V
Working Power	10W-100W OR Accordingly
Dimension	Length 60mm* diameter 3.8mm or Customization
Resistance	Accordingly
Leads	Nickel wires
Working Temperature	400~500°C
Insulation Sleeve	Accordingly

FAQ

1. who are we?

Factory/manufacturer of Ceramic Heating elements

2. how can we guarantee quality?

Always a pre-production sample before mass production;
